The LMS Stud.IP has had an Opencast integration provided by a plugin for years. This plugin received an complete overhaul recently, adding new features and an improved ui for users and admins.

New features include:

- Working upload tool for files of nearly abritrary sizes,

- LTI integration for authentication and permission handling,

- Support for Opencast 3.x, 4.x and beyond

- Connection to multiple Opencast systems possible
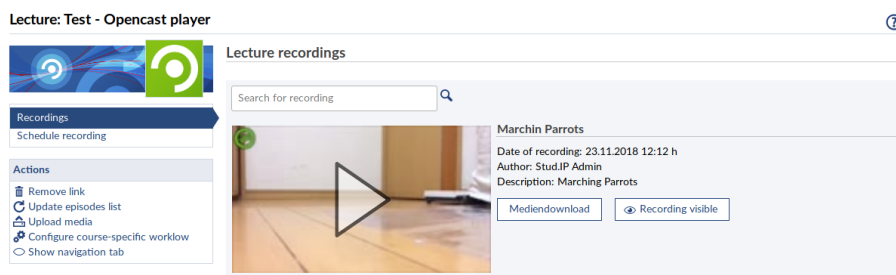

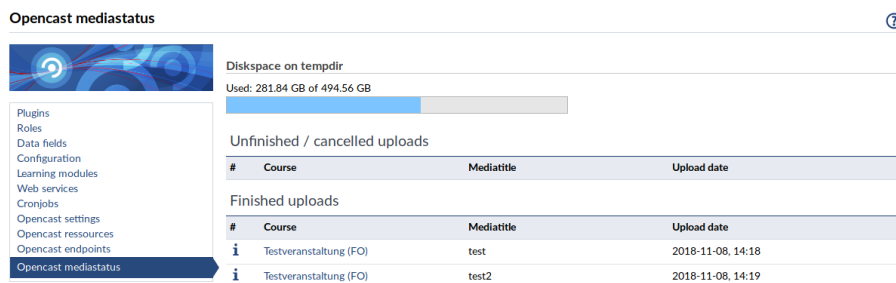

- Comfortable configuration and maintenance
